

## CreositySpace – Circuit Creators

### Video Presentation Discussion Prompts

One of the most satisfying elements of the live CreositySpace presentations is watching the excitement in the students when they provide answers to the questions posed by the entrepreneurs during their presentations. We've tried to maintain that student involvement with the digital presentations by providing questions throughout the presentation. We suggest that, throughout the presentation, you pause the playback to enable a couple of students to answer the questions posed by the presenter. How long you pause and the number of answers you entertain are dependent on the time available in your class.

Questions are divided into primary questions (intended to spark a mid-presentation discussion) and secondary questions (not as well suited for a mid-presentation discussion but more as a thought prompts for students).

Time Stamp	Discussion Question	Question Type Primary or Secondary (P/S)
0:17	Why does the light turn on when you flip a light switch?	P
0:52	There are lots circuits you encounter everyday that have different types of switches. Can you think of some examples?	S
2:09	Have you ever heard of a smart home?	S
3:06	What happens when you can't monitor the data in these hard to reach or harsh environments?	P
