

The Electricity Song by Jon Ashdown

Refrain:

Electricity is an invisible force that does incredible things.

Electricity is an invisible force that does incredible things.

Refrain x2

Verse 1

It powers the lights in your home and it helps running water flow.

It helps planes fly through the air or your mom blow dry her hair.

Refrain

Verse 2

It helps you mow the grass or drive a car real fast

Send a text or make a call or even see through a wall

Refrain x2

Verse 3

Next time you drive down the road and you see a traffic light

Turn green, yellow or red, you'll remember what we said

Refrain x 2

Verse 4

If we make a circuit and apply this invisible force,

Electrons flow through the wires and light your life, oh so bright

If we make a circuit and apply this invisible force,

Electrons flow through the wires and light your life, oh so bright

Refrain

Verse 5

Gravity keeps us on the ground, electricity shoots us to the moon

Gravity keeps us on the ground, electricity shoots us to the moon

Gravity keeps us on the ground, electricity shoots us to the moon

Refrain x 2
